## Erlebnispark Tripsdrill Highlights

### G'sengte Sau

This exciting roller coaster ride combines modern technology with a nostalgic background. You'll fly through the air, feeling 3G forces and weightlessness as you speed around a beautiful old castle, the *Rauhe Klinge* (Rough Blade).

### Bathtub Flume Ride

While a bathtub ride may not sound exciting at first, take a closer look. This log flume ride is the tallest one in Europe. Your small log boat moves backwards and forwards at 60 km/h until you take the final plunge down from the castle.

### Waschzuber-Rafting

Climb inside a large barrel and prepare to get wet. You will soon be barreling down river rapids, speeding and turning in circles as the water splashes around you.

## More Tripsdrill Attractions

Erlebnispark Tripsdrill offers versatile entertainment for kids and adults. The Stromberg Express is a good alternative for those who don't like the high-speed adrenaline rides.

There's 35 hectares of forest and the opportunity to observe wild animals in their natural habitats. Spinning teacups and the high swing, those old amusement park favorites, are also here.

The wedding market consists of nostalgic, romantic rides like butterfly flights and wedding carriages. And the enchanting vineyard includes wine-related rides as well as an opportunity to sample the local vintage.
